

FALL SENSOR

Falling is the biggest threat for the elderly population. Fall may lead to declining function and poor health and it often relates to significant morbidity. How to manage the risk of falling becomes an important issue for medical care.

Fall Sensor is designed for detecting a fall, offering a comprehensive way of managing your risk of falling 24 hours a day. If a fall is detected, a call is automatically dialed to Central Monitoring Station to open a two way communication to ensure user's problem is handed properly and timely.

If no sudden movement or tilt from horizontal to vertical within 10 seconds since a fall detection, an unconsciousness alarm will be raised, allowing the most appropriate action to be taken. Besides, you also can get help at the push of the button.

A simple fall may cause a devastating consequence. Fall Sensor can help you get immediate help without missing any important moment !

Features:

- Smallest and most delicate fall detector in the market
- Waterproof
- Low Battery detection
- Pendant style
- Range: 433 MHz: over 130 meters in open space
- Battery life: 2.5 years or over
- Dimensions: 58.6 X 42 X 19 mm
- * Note: Battery life is calculated at an average of one activation per day.
